The Adobe Dreamweaver 9.0 update addresses issues discovered after Dreamweaver CS3 was released.

- Troubleshooting cursor behavior.
The cursor does not behave properly when typing English text in Design view.

SYSTEM REQUIREMENTS
-- Adobe Dreamweaver CS3 Middle Eastern version. Note: this update is not compatible with other language versions of Dreamweaver CS3. Updates for other language versions will be available separately.
-- Mac OS X 10.4.8 or higher.

INSTALLATION NOTES
To install the Dreamweaver 9.0 update:
1. Disable all virus protection software.
2. Ensure that the folder on your hard drive containing Dreamweaver is named "Adobe Dreamweaver CS3."
3. Double-click the "Adobe Dreamweaver Updater" application. If the updater reports that it cannot find the application to update, please uninstall Dreamweaver CS3, then re-install the application (using the default folder name "Adobe Dreamweaver CS3"), then run the updater.
4. Follow the on-screen instructions.

Additional Notes

1. Quit Dreamweaver CS3.
2. Move any personal files that you want to save from the Applications/Adobe Dreamweaver CS3 folder.
3. Delete the Applications/Adobe Dreamweaver CS3 folders and its contents.
4. Empty the trash.
5. Run the Dreamweaver CS3 installer.
6. Run the Dreamweaver Documentation update.

This updater will update only the retail version of Adobe Dreamweaver CS3 software and not any pre-release (Beta) versions.
